SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China.

The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.

With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and then assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.

Policymakers’ near-term challenge is to successfully manage the final descent of inflation to target, calibrating monetary policy in response to underlying inflation dynamics and—where wage and price pressures are clearly dissipating—adjusting to a less restrictive stance. At the same time, in many cases, with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation to rebuild budgetary capacity to deal with future shocks, raise revenue for new spending priorities, and curb the rise of public debt is needed.

Targeted and carefully sequenced structural reforms would reinforce productivity growth and debt sustainability and accelerate convergence toward higher income levels. More efficient multilateral coordination is needed for, among other

things, debt resolution, to avoid debt distress and create space for necessary investments, as well as to mitigate the effects of climate change.

INDIAN ECONOMY

As per a recent report called India Economic Outlook, January 2024 by Deloitte, India's progress over the past decade has been quite remarkable. The economy's position has gone from the tenth largest ten years ago to the fifth largest today. India has been the fastest growing major economy for the third year in a row—a bright spot in a global economy facing strong recessionary impulses, multi-decade high inflation, record levels of public debt and the squeezing of real household incomes. Looking over the next few decades, the country presents a major growth opportunity. Realizing the potential of a US\$26 trillion economy details the path ahead, from demographics to domestic consumption to reform. India is most likely to overtake Germany and Japan and will become the third largest economy after China and the US by 2030. In 25 years, at a size of US\$26 trillion, our per capita GDP would be over US\$15,000, six times its current level. We have a real India-plus opportunity in nearly every sector on the precipice of dramatic disruption—from energy and automobiles to pharmaceuticals and medical devices. New manufacturing methods combined with new supply routes are a chance to claim a more central position in the new economy. Second, there is massive potential of technology to address many of our most persistent development challenges, both in the private and public sectors. Whether it is generating jobs, improving access to healthcare and education, increasing the degree of formalization in the economy, public services delivery or getting more women into the workforce—technology will play a crucial role in solving these fundamental challenges. Our technology strength means that we are well placed to continue reimagining our national blueprint using digital. If we use technology in the right way — and put our people first — it can fix structural problems that have held us back for decades.

DEBT MARKETS IN INDIA:

The Indian debt market is fairly large, with the bond market presently sized at around \$2.34 trillion. Of this, \$1.83 trillion is dedicated to government bonds, while \$510 billion is allocated to corporate bonds (as of Mar-22, Source: CCIL, SEBI). Government bonds constitute 78% of the overall outstanding bonds in the country, while corporate bonds account for 22% of the market. Over the past five years, starting from March 2018, the total outstanding bonds have witnessed a remarkable growth of 77%, with government bonds experiencing an 85% rise and corporate bonds increasing by 53%.

Indian Corporate Bond Markets:

With the growing importance of investment for higher GDP growth, there is an urgent need for alternative sources of financing; and corporate bonds market can play an important role here. A well- developed and smooth functioning corporate bonds market serves as an important driver of economic growth as it provides an additional source of long term finance for industry. In fact, ideally there should be matching of long term projects with long term finance and the bond market offers an avenue for the same. In India, RBI and SEBI have taken various steps to develop and strengthen the corporate bonds market. However, while the size of the corporate debt market has expanded, it still remains relatively underdeveloped relative to the bank credit segment.

Private placement of debt remained the primary driver of resource mobilization in the debt segment, witnessing rise of 28 per cent in funds raised during 2022-23, relative to the previous fiscal year. As per PRIME Database, India's Corporate Bond Market raised INR 8.5 lac Crore in FY 2022-23 compared to INR 6.3 lac Crore which was INR 10 lac Crore in FY2011-12. These are major milestones which have helped corporates in India to raise cheap debt capital. To improve liquidity and participation, the face value of debt securities issued on private placement basis was reduced to Rs. 1 lakh from existing Rs.10 lakh with effect from January 2023.

8. *Our company relies on a team of experienced professionals to provide debenture trustee services. The loss of any key personnel could have a negative impact on the company's business.*

Our future success substantially depends on the continued service and performance of the members of our senior management team and other key personnel in our business for management, running of our daily operations, and the planning and execution of our business strategy. There is intense competition for experienced senior management and other key personnel with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired. We face specific disadvantages in our efforts to attract and retain our management.

Additionally, we may not have in place the necessary systems and processes to develop key personnel internally. Our Company does not maintain any director's and officer's insurance policy or any keyman insurance policy. The loss of key members of our senior management or other key team members, particularly to competitors, could have an adverse

effect on our business and results of operations. Our performance also depends on our ability to attract and train highly skilled personnel. If we are unable to do so, it would materially and adversely affect our business, prospects and results of operations.

9. *We are dependent on Debenture trustee fees for a substantial share of our revenue and profitability. Any reduction in our Debenture trusteeship fees could have material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Although our company has diversified their business by offering other services, such as Security Trustee Services, Facility Agent, Securitization Trustee, Share Pledge Trustee, Alternate Investment Fund/Family Trust, Escrow and Monitoring Agency services, our significant revenue is from debenture trusteeship fees especially from the Maharashtra region. Our revenue from debenture trusteeship fees contributes 46.06%, 56.10% and 59.99% for the FY 2023-24, FY 2022-23 and FY 2021-22 respectively. The details of revenue bifurcation and for region wise revenue bifurcation please refer the section “Business Overview” appearing on page no 110 of this Prospectus:

We majorly require KMP and senior managerial personnel for our operations and maintenance and we also depend on other intermediaries including legal advisors for supply of services forming part of overall project execution. Any delay in supply of services may delay in our projected completion of work and ultimately affect our business.

In addition, our business faces various risks, including, among others, risks related to general economic and market conditions in India, significant changes in the technological environment, operational risks and regulatory changes, any of which could have a material adverse effect on our business, financial condition and results of operations. We are subject to extensive statutory and regulatory requirements and supervision, which have material influence on, and consequences for, our business operations and There are operational risks associated with the financial services industry which, if realised, may have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects. If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.

The financial services industry is characterized by increasingly complex and integrated infrastructure and services, new and changing business models and rapid technological and regulatory changes. Our clients’ needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients’ demands for new services, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients’ increasingly sophisticated requirements. Transitioning to these new technologies may be disruptive to our resources. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services and user experience, or retain and attract skilled technology staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth.

10. *The Company is dependent on few numbers of customers for sales from top 10 customers. Loss of any of these large customers may affect our revenues and profitability.*

Our top ten customers contributes 44.39%, 41.99%, and 34.38% for our total revenue from operations for the year ended March 31, 2024, 2023 and 2022 respectively.

Any decline in our service standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from such top ten customers may adversely affect our revenues and results of operations. Though we believe that we will not face substantial challenges in maintaining our business relationship with valuable clients, there can be no assurance that we will be able to maintain long term relationships with our valuable clients or find new customers in time.

11. *Our Company will not receive any proceeds from the Offer for Sale portion, and the Promoter Selling Shareholder/ Selling Shareholder shall be entitled to the Offer Proceeds to the extent of the Equity Shares offered by them in the Offer for Sale.*

12. *The regulatory environment in which we operate is subject to change, and such changes may be unpredictable and may expose us to additional costs or materially adversely affect our business, growth results and financial condition.*

The legislative and regulatory environment in which we operate has undergone many changes in the recent past. We believe that significant regulatory changes in our industry are likely to continue on a scale that exceeds the historical pace of regulatory change, which is likely to subject industry participants to additional, generally more stringent regulation. The requirements imposed by our regulators are designed to ensure the integrity of the financial markets and to protect interest of Stakeholders.

New laws or regulations, changes (including increasing strictness) in the enforcement of existing laws or regulations, or any consequent penalties, applicable to us, our employees and our customers may adversely affect our business. Our ability to function in this environment will depend on our ability to constantly monitor and promptly react to legislative and regulatory changes. Regulatory changes may have a material adverse impact on our business as a whole which may adversely affect our financial conditions and results of operations.

13. *Our company may face litigation from debenture holders if we fail to adequately fulfill our obligations and duties. This could lead to significant legal costs and damages.*

If a debenture holder sues our company, then it could be ordered to pay damages to the debenture holder. In addition, our company may also have to pay its own legal costs and the legal costs of the debenture holder. As a result of which could adversely affect our business, financial conditions and results of operations.

There are no past instances of the company incurring any legal costs or damages owing to any litigations from debenture holders.

14. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

15. *There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities.*

In the past, our company has at several instances, delayed in filing our GST returns, EPF returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees and interest on late deposits levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected.

We believe that our focus on completing assignments in a timely manner and on quality has helped us build strong relationships with our customers and bolster our reputation in the industry in which we operate. In fact, all of the assignments that we execute for private sector clients are sourced through nomination i.e. where customers with whom we have an existing relationship or new customers approach us directly for their proposed assignments. Further, we have received additional assignments from our existing customers despite increased competition in the region especially in Maharashtra region within which we operate. If any of our relationships with our existing customers were to be altered or terminated and we are unable to forge similar relationships with new customers in the future, our business, financial condition, results of operations, cash flows and business prospects could be materially and adversely affected.

- 18. *With the object of Investment in Wholly owned subsidiary i.e. Beacon Investor Holdings Private Limited, to commence the services of Depository Participant and Registrar & Share Transfer Agent, Amendments in regulations / NSDL requirements w.r.t increase in costs could lead to fluctuation in deployment of Net Proceeds. - 19. *A general economic downturn could lead to a decrease in the demand for debenture trustee services, as companies are less likely to issue debentures during difficult economic times and this could pose a risk to the profitability and viability of debenture trustee.***

During an economic downturn, companies are less likely to issue debentures for a number of reasons, (a) Companies may reduce their investment spending in order to conserve cash and weather the storm. This could lead to fewer new debenture issuances, (b) In a downturn, there is a greater risk that companies will default on their debt obligations. This makes debentures a less attractive investment option for investors, which could lead to lower demand for debenture trustee services, (c) Banks and other lenders may tighten their credit standards during a downturn, making it more difficult for companies to borrow money. This could also lead to fewer debenture issuances. If the demand for debenture trustee services decreases, this could pose a risk to the profitability and viability of debenture trustees. If there are fewer debenture issuances, debenture trustees will generate less revenue from their fees. Although our company has diversified their business by offering other services, such as Security Trustee Services, Facility Agent, Securitization Trustee, Share Pledge Trustee, Alternate Investment Fund/Family Trust, Escrow and Monitoring Agency services. This can help to reduce the reliance on debenture trustee fees and makes more resilient to a downturn in the demand for these services. Our Company have to incur higher costs in order to monitor and enforce the terms

of debenture agreements, particularly if there is an increase in defaults which could adversely affect our business, financial conditions and results of operations.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our

EXTERNAL RISK FACTORS

1. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the

severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees' and suppliers' ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

2. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed Spread X Securities Private Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

5. *There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure

or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

6. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

This may negatively impact our results of operations, planned capital expenditures and cash flows.

7. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

8. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

10. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Offeror at various prices and is collated from Bids received from various investors.

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

GLOBAL ECONOMIC OUTLOOK

Moderating Inflation and Steady Growth Open Path to Soft Landing

Global growth is projected at 3.1 percent in 2024 and 3.2 percent in 2025, with the 2024 forecast 0.2 percentage point higher than that in the October 2023 World Economic Outlook (WEO) on account of greater-than expected resilience in the United States and several large emerging market and developing economies, as well as fiscal support in China.

The forecast for 2024–25 is, however, below the historical (2000–19) average of 3.8 percent, with elevated central bank policy rates to fight inflation, a withdrawal of fiscal support amid high debt weighing on economic activity, and low underlying productivity growth. Inflation is falling faster than expected in most regions, in the midst of unwinding supply-side issues and restrictive monetary policy. Global headline inflation is expected to fall to 5.8 percent in 2024 and to 4.4 percent in 2025, with the 2025 forecast revised down.

With disinflation and steady growth, the likelihood of a hard landing has receded, and risks to global growth are broadly balanced. On the upside, faster disinflation could lead to further easing of financial conditions. Looser fiscal policy than necessary and then assumed in the projections could imply temporarily higher growth, but at the risk of a more costly adjustment later on. Stronger structural reform momentum could bolster productivity with positive cross-border spillovers. On the downside, new commodity price spikes from geopolitical shocks—including continued attacks in the Red Sea—and supply disruptions or more persistent underlying inflation could prolong tight monetary conditions. Deepening property sector woes in China or, elsewhere, a disruptive turn to tax hikes and spending cuts could also cause growth disappointments.

Policymakers' near-term challenge is to successfully manage the final descent of inflation to target, calibrating monetary policy in response to underlying inflation dynamics and—where wage and price pressures are clearly dissipating—adjusting to a less restrictive stance. At the same time, in many cases, with inflation declining and economies better able to absorb effects of fiscal tightening, a renewed focus on fiscal consolidation to rebuild budgetary capacity to deal with future shocks, raise revenue for new spending priorities, and curb the rise of public debt is needed.

Targeted and carefully sequenced structural reforms would reinforce productivity growth and debt sustainability and accelerate convergence toward higher income levels. More efficient multilateral coordination is needed for, among other things, debt resolution, to avoid debt distress and create space for necessary investments, as well as to mitigate the effects of climate change.

Growth Outlook: Resilient but Slow Global growth, estimated at 3.1 percent in 2023, is projected to remain at 3.1 percent in 2024 before rising modestly to 3.2 percent in 2025 (Table 1). Compared with that in the October 2023 WEO, the forecast for 2024 is about 0.2 percentage point higher, reflecting upgrades for China, the United States, and large emerging market and developing economies. Nevertheless, the projection for global growth in 2024 and 2025 is below the historical (2000–19) annual average of 3.8 percent, reflecting restrictive monetary policies and withdrawal of fiscal support, as well as low underlying productivity growth. Advanced economies are expected to see growth decline slightly in 2024 before rising in 2025, with a recovery in the euro area from low growth in 2023 and a moderation of growth in the United States. Emerging market and developing economies are expected to experience stable growth through 2024 and 2025, with regional differences.

GLOBAL BOND MARKETS

International bonds globally and in Asia

For any particular jurisdiction, the international bond market usually develops after the local corporates become seasoned in their domestic capital markets. Domestic corporate borrowers tend to raise money in their own domestic market first, not only because their operations are in local currency, but also because they are more familiar with investors and regulations closer to home. As they gain experience, they may gradually tap another country/jurisdiction's market with issuances in that country/jurisdiction's currency, or issue bonds internationally in a global foreign currency and have them cleared through an international clearing house.

Unlike local currency bonds in the domestic market, international bonds are mostly sold only to institutional investors and individual professional investors. Reasons for raising funds through international bonds include, but are not limited to, meeting foreign currency funding needs, managing funding costs and structure, diversifying funding channels and investor base, and raising profile in the international markets. For investors, international bond markets are a way to obtain exposure to emerging market credits without the need to establish access to individual domestic markets or manage foreign exchange risks associated with local currencies. Investing in international bonds may also help with portfolio diversification and yield enhancement, especially in emerging markets such as Asia.

The Asian international bond market had experienced significant growth over recent years, despite a retreat in 2008. Of all bond issuances from Asia, international issuances made up only 7.2% in 2006 and accounted for only 3.6% in 2008 with the global financial crisis. Since then, international issuances expanded gradually and stabilised at around 17- 19% of all bond issuances from Asia from 2017 to 2021. In 2021, it amounted to record level of USD 617 billion. However, in 2022, due to multiple headwinds affecting the global financial markets the proportion of international bond issuance shrunk significantly back to 2015 level, accounting for only 12.4% of bond issuances from Asia.

One main reason for the lower proportion of international issuances in Asia, compared with the world average of around 30-40%, as interview participants pointed out, is a preference for many Asian issuers to secure financing onshore. Detailed reasons vary from country (jurisdiction) to country (jurisdiction).

While reliable regional data is difficult to obtain, generally speaking the view of market participants is that Asian companies source a smaller proportion of their total borrowings from the bond market in comparison with the US and European markets. For example, in China, total loan financing accounts for more than four times the amount of bond financing for non-financial corporates, while in Europe corporate loans outstanding are about three times the amount of corporate bonds outstanding, and in the US market the outstanding amount of corporate bonds exceeds that of corporate

loans by 6%.² Considering the lower ratio of bond financing in Asia, the bond market in this region has potential to grow further.

Global International Bond Issuance – by region (deal nationality)

Percentage of international bond issuances over all issuances

Source: ICMA analysis using Dealogic data (March 2023)

When issuing bonds, it is common practice for issuers to appoint market intermediaries, typically banks, to manage the debt capital raising process. The lead managers help issuers to understand market conditions and explore investor interest, and then manage book-building and allocation. Usually, these bank arrangers have an aim to cultivate and maintain investment relationships with investors that are both able to contribute to satisfying the issuer's ongoing funding needs, and also willing to act as committed ("buy and hold") stakeholders in the issuer's business. In particular, it is often important to issuers that investors in the primary market are purchasing bonds for investment purposes, rather than trading purposes, which helps to ensure that issuers will have closer relationships with and better long-term understanding of their direct investors. Therefore, the bank arrangers' ability to ensure access to a wide investor base, optimally price the transaction, and fulfil the issuers' funding requirements are essential contributors to the success of the bond issuance. Bond arranging activities comprise originating and structuring, bookbuilding, legal and transaction documentation preparation, and sale and distribution. Where a bond is arranged in practice depends on many factors but is mainly influenced by the location of the leading banks (and their teams of professionals across investment banking, trading, legal, and operations) who are appointed to manage the transaction. A financial centre's regulatory system, independence of judiciary, and enforceability of contracts are also important for banks to minimise legal and operational risk in execution

INDIAN ECONOMY

As per a recent report called India Economic Outlook, January 2024 by Deloitte, India's progress over the past decade has been quite remarkable. The economy's position has gone from the tenth largest ten years ago to the fifth largest today. India has been the fastest growing major economy for the third year in a row—a bright spot in a global economy facing strong recessionary impulses, multi-decade high inflation, record levels of public debt and the squeezing of real household incomes. Looking over the next few decades, the country presents a major growth opportunity. Realizing the potential of a US\$26 trillion economy details the path ahead, from demographics to domestic consumption to reform. India is most likely to overtake Germany and Japan and will become the third largest economy after China and the US by 2030. In 25 years, at a size of US\$26 trillion, our per capita GDP would be over US\$15,000, six times its current level. We have a real India-plus opportunity in nearly every sector on the precipice of dramatic disruption—from energy and automobiles to pharmaceuticals and medical devices. New manufacturing methods combined with new supply routes are a chance to claim a more central position in the new economy. Second, there is massive potential of technology to address many of our most persistent development challenges, both in the private and public sectors. Whether it is generating jobs, improving access to healthcare and education, increasing the degree of formalization in the economy, public services delivery or getting more women into the workforce—technology will play a crucial role in solving these fundamental challenges. Our technology strength means that we are well placed to continue reimagining our national blueprint using digital. If we use technology in the right way — and put our people first — it can fix structural problems that have held us back for decades.

Decade of transformative growth (2014-2024)

(Source: <https://www.ibef.org/blogs/indian-economy-a-review-key-takeaways>)

The Indian economy underwent significant structural reforms during this period, boosting its macroeconomic foundations. These measures propelled India to become the fastest-growing economy among G20 nations. Further, efficient handling of the COVID-19 pandemic and recent geopolitical challenges has ensured that the Indian economy continues to outperform its global peers. Current estimates suggest a growth of 7.3% in 2023-24, building on the impressive 9.1% (FY22) and 7.2% (FY23) growth in the preceding two years. It is commendable that India is expected to post a GDP growth rate of over 7% for the third year in a row while the global economy is struggling to post a 3% growth.

The structural reforms implemented since 2014 have strengthened the macroeconomic fundamentals of the economy. Below, we list the key reforms implemented during the last decade:

Challenges Emerge Alongside India's Reform-Driven Growth

The report also emphasized the challenges that the Indian economy is facing.

These challenges are:

Geoeconomic changes and evolving globalization trends: India's economic growth is not only influenced by its own actions but also by global events. As the world becomes more interconnected, global trade patterns and economic cooperation changes impact India. The current trend of friend shoring and onshoring, driven by a shift away from hyper-globalization, is affecting worldwide trade and, consequently, overall global growth.

Complex Interplay of Energy Security and Economic Growth: Choosing between ensuring enough energy for economic growth and transitioning to cleaner energy is a complex issue. It involves factors like politics, technology, finances, economics, and society. Moreover, decisions made by one country affect others, making the situation even more intricate.

Employment risks in the AI era: The rise of Artificial Intelligence (AI) is a significant challenge for governments globally, especially in service sectors where jobs may be affected. An IMF paper suggests that 40% of global jobs are at risk due to AI, presenting both opportunities and risks.

Filling the gaps in the Skills, Education, and Health ecosystem: Nationally, it's vital to ensure a skilled workforce, quality education at all levels, and good health among the population. This boosts economic productivity by having capable and healthy workers.

Factors Driving the Domestic Economy

Strong Credit Growth: Bank credit has grown remarkably in recent years, surpassing deposit growth fueled by sustained demand and robust post-pandemic economic recovery. FY23 witnessed a noteworthy 15% growth in non-food bank credit, the highest in the past decade. This surge in credit was accompanied by a substantial enhancement in the banking sector's health. Notably, the asset quality across all Scheduled Commercial Banks (SCBs) groups improved, with Gross Non-Performing Assets (GNPAs) and Net NPAs reaching a multi-year low by September 2023. This positive transformation in the banking sector contrasts sharply with the challenges it faced in the previous decade, emphasizing the success of reforms the government and the RBI implemented in addressing the "twin balance sheet problem." The cleansing of balance sheets facilitated a healthier credit environment and a revival of credit growth.

India's robust external sector demonstrating resilience in challenging times:

India's external sector displays resilience with robust merchandise and services exports. Merchandise exports reached a record high of US\$ 451.1 billion in FY23, while services exports, especially in software, consistently contribute significantly. The nation's trade balance improved, witnessing a US\$ 166.4 billion surplus in April-November 2023. Remittances, totaling US\$ 125 billion in 2023, contribute to the current account balance, maintaining a comfortable position.

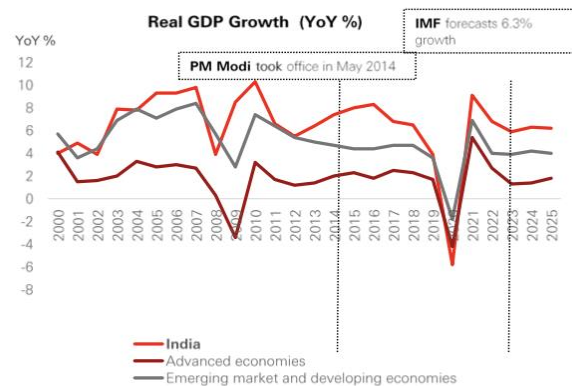

India attracts foreign investment, with foreign portfolio investors (FPIs) increasing exposure by US\$ 28.8 billion in H1 FY24. The country remains a preferred Foreign Direct Investment (FDI) destination, achieving a cumulative FDI of US\$ 596.5 billion during FY15-FY23. Stable macroeconomic factors and a positive global perception attract investors. The Indian rupee remains stable against the US dollar, and foreign exchange reserves reach US\$ 623.2 billion, covering over ten months of imports.

Challenges, such as geopolitical tensions and rising shipping costs, pose risks. While the share of exports in GDP may moderate in FY24 due to global demand slowdown, sustained FDI inflows and confidence in the Indian economy are anticipated. Remittances are expected to grow by 8%, reaching US\$ 135 billion in 2024, contributing to India's economic stability.

Continued focus on enhancing social infrastructure: The Union government's spending on social services saw a Compound Annual Growth Rate (CAGR) of 5.9% from FY12 to FY23, with an 8.1% CAGR in capital expenditure, indicating the development of societal assets. Initiatives like the Ujjwala Yojana, PM-Jan Aarogya Yojana, PM-Jal Jeevan Mission, Ayushman Bharat scheme, and PM-AWAS Yojana prioritize universal access to basic amenities. This approach, distinct from short-term measures, not only constructs lasting social infrastructure but also elevates individuals to improved living standards and opportunities, fostering empowerment among previously underserved segments of the Indian population.

Other Key Factors:

- Rising Youth Employment Trends:** According to the Periodic Labour Force Survey (PLFS), the youth unemployment rate decreased from 17.8% in 2017-18 to 10% in 2022-23.
- Women's Workforce Empowerment:** Female Labor Participation Rate (LFPR) increased from 23.3% in 2017-2018 to 37% in 2022-23, reflecting a shift towards women-led development in India. Female Gross Enrolment Ratio (GER) in senior secondary education more than doubled from 24.5% in FY 2005 to 58.2% in FY 2022, and the female GER in higher education quadrupled from 6.7% in FY 2001 to 27.9% in FY 2021.
- Service Sector Growth:** The service sector's share in total GVA has risen from 51.1% in FY14 to 54.6% in FY24, driven by a surge in non-contact services post-pandemic. The government's digitalization drive has significantly shaped the service sector's digital face.
- Consumption-Led Growth and Private Final Consumption Expenditure (PFCE):** PFCE's share in GDP has emerged as a major growth driver, increasing from an average of 58.4% in the eight years preceding the pandemic to 60.8% in the last three years. The rise in per capita real Gross National Income (GNI) and pragmatic policies have strengthened consumption demand.
- Agricultural Sector Resilience:** Despite global challenges and climate variability, the agricultural sector has shown remarkable persistence, growing at an average annual rate of 3.7% from FY15 to FY23. Record increases

in food grain production and substantial growth in agricultural exports contribute to India's agricultural sector resilience.

The Road Ahead

The report states that India's robust growth is anticipated to continue, supported by macroeconomic stability. The official estimate for FY24 projects a 7.3% growth rate, with decreasing headline inflation. Favorable factors include resilient service exports, lower oil import costs, and a reduced current account deficit of 1% of GDP in H1 FY24. The positive outlook is driven by the digital revolution, supportive regulatory environment, social and economic upliftment measures, and efforts to diversify exports. Reforms implemented over the past decade establish a foundation for resilient governance, setting the stage for sustained economic growth. Further reforms at sub-national levels, focusing on MSMEs, regulatory efficiency, land availability, and energy needs, are expected to accelerate economic growth.

DEBT MARKETS IN INDIA

The Indian debt market is fairly large, with the bond market presently sized at around \$2.34 trillion. Of this, \$1.83 trillion is dedicated to government bonds, while \$510 billion is allocated to corporate bonds (as of Mar-22, Source: CCIL, SEBI). Government bonds constitute 78% of the overall outstanding bonds in the country, while corporate bonds account for 22% of the market. Over the past five years, starting from March 2018, the total outstanding bonds have witnessed a remarkable growth of 77%, with government bonds experiencing an 85% rise and corporate bonds increasing by 53%.

IMPORTANT SOURCE OF CORPORATE CAPITAL

The presence of a robust bond market makes it easier for governments and corporations to raise funds in a cost-effective manner. Furthermore, it assists the banking system in achieving enhanced asset-liability management. The debt market plays a crucial role in supporting these essential aspects by enabling the efficient allocation of capital, promoting transparency and ensuring financial stability. The primary and secondary markets serve as crucial foundations for the issuance, trading and settlement of fixed income securities in the debt market.

The primary market is fundamentally the place where companies raise capital through the initial issuance of securities (such as stocks or debentures) to investors.

Indian Corporate Bond Markets:

With the growing importance of investment for higher GDP growth, there is an urgent need for alternative sources of financing; and corporate bonds market can play an important role here. A well- developed and smooth functioning corporate bonds market serves as an important driver of economic growth as it provides an additional source of long term finance for industry. In fact, ideally there should be matching of long term projects with long term finance and the bond market offers an avenue for the same. In India, RBI and SEBI have taken various steps to develop and strengthen the corporate bonds market. However, while the size of the corporate debt market has expanded, it still remains relatively underdeveloped relative to the bank credit segment.

Private placement of debt remained the primary driver of resource mobilization in the debt segment, witnessing rise of 28 per cent in funds raised during 2022-23, relative to the previous fiscal year. As per PRIME Database, India's Corporate Bond Market raised INR 8.5 lac Crore in FY 2022-23 compared to INR 6.3 lac Crore which was INR 10 lac Crore in FY2011-12. These are major milestones which have helped corporates in India to raise cheap debt capital. To improve liquidity and participation, the face value of debt securities issued on private placement basis was reduced to ₹ 1 lakh from existing ₹ 10 lakh with effect from January 2023.

With the objective of giving impetus to the corporate bond markets, in terms of increased participation and liquidity enhancement, SEBI permitted stock brokers to participate on Request for Quote (RFQ) platform on behalf of clients, directed AIFs to undertake at least 10 per cent of their secondary market trades through the RFQ platform and allowed them to participate in credit default swaps market.

Pertaining to the EBP platform, the concept of Anchor Investor was brought- in to assist an issuer in assessing demand for its issuance, the book building process for private placement of debt was modified to address the concerns of fastest finger first and to provide a level playing field for the bidders. Further, in order to enable the operationalization of Limited Purpose Clearing Corporation (LPCC), necessary amendments of SECC regulations have been carried out, in line with the requirements of the Repurchase Transactions (Repo) (Reserve Bank) Directions, 2018 and Payment and Settlement Systems Act, 2007.

However the capital raised in the market has largely been raised by the highly rated companies majorly consisting of Public Sector Undertakings and the BFSI sector. In the coming days, SEBI proposes to reduce the minimum subscription level to INR 10000 which will propel the retail investors to start evaluating corporate debt as a real option for their savings. This will be further propelled by the onset and the grant of multiple Online Bond Platform Licenses by SEBI. These platforms have started democratizing bond trading and made Indian Corporate Bonds much more accessible to the wider spectrum of Indian investors including retail investors, HNIs, small corporates, treasuries and banks too.

Investor Protection and Awareness:

SEBI's regulatory framework is founded on the underpinning idea that a well-informed investor is a better protected investor. Investor education and awareness continued to be the bedrock of SEBI's pursuits over the past thirty years of its

regulatory trajectory. With the influx of retail investors into the securities market in the recent years, the need for investor education and awareness became more imperative, particularly to sensitize the first time investors.

During 2022-23, SEBI continued to undertake its investor awareness and education activities. In 2022-23, SEBI conducted 649 regional seminars in association with MIIs, 10 regional seminars in association with AMFI and several programmes under the aegis of Investor Associations, Securities Market Trainers and Commodities Derivatives Trainers for investor education and awareness. SEBI also joined hands with various domestic and international organizations and participated in several global and national events in solidarity with the broader goals of investor protection.

Timely resolution of investor grievances is crucial for enhancing investors' faith and confidence in the securities market. Taking cognizance of the same, SEBI has been taking various regulatory measures to expedite the redressal of investor grievances. The number of pending actionable grievances has been steadily declining over the years due to expeditious disposal by SEBI. Out of 34,752 complaints received during 2022- 23, 88.1 per cent were e-complaints. During 2022-23, 39,062 complaints were redressed, which included 4,290 complaints pending for regulatory action from previous year."

DEBENTURE TRUSTEE - AN IMPORTANT PILLAR OF THE DEBT MARKET IN INDIA

Background on Debenture Trustees

There is increasing demand for trust and transparency across capital markets globally. Debenture Trustees today play a vital role in providing the institutional framework for bond issuances in the economy and supporting the development of Corporate Bond market in India. A Debenture Trustee (DT) is an independent entity appointed by the issuer of debentures to protect the interest of holders of debentures.

To act as debenture trustee, the entity should either be a scheduled bank carrying on commercial activity, a public financial institution, an insurance company, or a body corporate. The entity should be registered with SEBI to act as a debenture trustee. The SEBI (Debenture Trustees) Regulations, 1993 governs the Debenture Trustees and provide for eligibility criteria for registration of Debenture Trustees, monitoring and review, code of conduct, procedure of action in case of defaults, avoidance of conflict of interest amongst other things. Debenture Trustee is systemically important intermediary in capital markets landscape playing a significant role in creating and enforcing investor confidence both retail and institutional. During the holding period of these issuances, DT is actively engaged to ensure investor protection through constant monitoring and reporting framework of issuances. The DT would endeavor to get all information with respect to the bond issuances notified on timely basis to investors, regulators, agencies for any further action as necessary. Over a period, Debenture Trustees have effectively developed robust internal processes, frameworks, and IT systems to adapt to dynamic regulatory changes. In case of secured debentures, creation of security in favor of Debenture Trustee entitles it to legal charge of the property for the benefit of debenture holders. The DT holds the secured property on behalf of issuer of security and for benefit of debenture holders and takes appropriate measures to protect the interest of debenture holders in the event of any breach of the trust deed or law. In order to understand the role of Debenture trustees properly, it is important to understand the debt market infrastructure and environment.

Main activities performed by the Debenture Trustees in India

- Ensure creation of security charge by Issuer in favor of Trustee
- Regulatory Compliances viz. Registrar of Companies (ROC), SEBI and Stock Exchange Filings
- Monitoring of payment of financial obligations to debenture holders and reporting to credit rating agency, Depository, Stock Exchanges, and other agencies in case of delay
- Monitoring various non-financial covenants as per transaction documents like downgrade of credit ratings, which might result in situation where Event of Default can be declared by Debenture holders
- Calling for periodical reports from Issuers to ensure regulatory compliances and monitoring of covenants as per transaction documents
- Enforcement Activities – Leading the Enforcement activities for Debenture Holders in case of default
- Active role played by DT in resolving debenture holders' grievances against the Issuer

Debenture trustees in India have been instrumental in providing critical inputs with respect to ever changing market risks and assisting the regulator in policy formation to strengthen the regulatory framework. Over the years the responsibilities and scope of work of DT have increased leading to additional reporting requirements to the regulators, credit rating

agencies, investors etc. The past two years or so have seen rapidly increasing stress in the Indian banking sector. The recent NBFC events have led to surge in defaults and DTs have acted promptly to undertake various actions under the existing legal framework of India including initiating legal proceedings for recovery of amounts due to debenture holders. In event of default by issuer of debentures, the Debenture Trustee have exercised their powers and authority to bring the secured property to sale, following the provision laid down in the trust deed and applicable law considering the nature of security and proceeds of sale are applied to redeem the debentures.

Role played by Debenture Trustees

Some of the challenges faced by Debenture trustee that often go unnoticed include lack of awareness on real role of trustees and understanding of what security really means and what does it take to enforce security through the legal framework in India. Secured debt instrument means that it is supported with some assets having value that is equal or more than the outstanding there against. It does not assure recovery of entire amount invested / due to the Investors. Debenture Trustee is responsible for taking legal recourse for enforcing the Security but cannot be responsible for the outcome of the legal process or resolution process undertaken and the time required for actual funds to flow back to the Investors. Debenture Trustee do not have coercive powers or authority under law. As per contractual provisions, following a default, the bond trustee will need to seek instructions from the bondholders as to the enforcement (or other) action that they wish it to take. It is pertinent to note some of the global best practices of trustee industry (*Source: International Practices of Bond Trustee Arrangements by International Capital Market Association (ICMA)*).

1. The bond trustee is entitled to seek indemnification, security and/or prefunding prior to taking any enforcement action
2. The bond trustee is not required to expend or risk its own funds under any circumstances, nor does it assume any of the issuer obligations or guarantee repayment by the issuer or endorse the issuer in any manner.

OTHER SERVICES OFFERED BY DEBENTURE TRUSTEES IN INDIA:

In the evolving financial landscape of India, the role of Debenture Trustees has steadily become more crucial and multifaceted. With the maturation and expansion of the Debenture Trustee market, it became apparent to those serving in this capacity that there were additional, related business opportunities that they could potentially explore and integrate into their service portfolio.

One such area of expansion involves Fiduciary Services for other financial products. These services have emerged as a frequent, pressing requirement for the Banking & Financial Services industry and have proven to be a profitable revenue source for Debenture Trustees in India. Their growth within this realm has allowed for the vertical integration of services, promoting efficiency and enhancing client relationships.

Notably, while Debenture Trustee Services necessitate a license issued by the Securities and Exchange Board of India (SEBI), the regulatory authority for securities markets in India, the provision of these other related and supplemental services does not require the procurement of a separate license. This regulatory state of affairs aids in reducing potential bureaucratic hurdles and allows Debenture Trustees to expand their service offering more seamlessly and flexibly.

As such, the evolution of the Debenture Trustee landscape in India has shown us that as markets mature, there exist abundant opportunities for expansion and diversification. In order to remain relevant and profitable, it has become increasingly apparent that service providers must be willing to venture into complementary service areas and diversify their traditional business model.

• SECURITY TRUSTEE FOR LOANS

As Security Trustees, the appointed entities hold and manage assets or securities on behalf of a group of lenders involved in syndicate financial transactions. Here, the role of a Security Trustee is akin to that of a custodian or representative of the lender consortium.

In India, such services are primarily utilized in project financing and syndicate lending scenarios to streamline the management of securitized assets. When a loan is secured by collateral, the Security Trustee holds the title to those securities. In case of default, the trustee exercises the rights over the collateral on behalf of the lenders.

One of the key advantages of using a Security Trustee is the effective management of relationships among the syndicate of lenders. By having the Security Trustee act as an intermediary, it ensures that actions are taken prudently and uniformly without any bias, reflecting the collective interests of all lenders in the syndicate.

Additionally, the use of Security Trustee services adds a further layer of protection for lenders, especially when loans are large and extended by a consortium of lenders. The legal and operational complexities involved in managing the security are efficiently handled by the Security Trustee.

- **AIF TRUSTEE (Alternative Investment Funds)**

AIF Trusteeship in India encompasses a comprehensive suite of services designed to facilitate the seamless establishment and operation of Alternative Investment Funds (AIFs). This includes meticulous document drafting services such as the creation of Trust Deeds, Private Placement Memorandums, Investment Management Agreements, Contribution Agreements, and the essential Form A, along with the submission of the AIF application to the Securities and Exchange Board of India (SEBI).

Acting as a corporate trustee, these entities provide pivotal support to AIFs, guiding clients through the intricate registration process and ensuring a smooth collaboration with various regulators including SEBI, the Reserve Bank of India (RBI), and tax authorities, while also navigating the complexities of compliance with FATCA and other international tax laws.

Furthermore, they offer expert advisory for setting up funds within India and in specialized zones like the International Financial Services Centre (IFSC) in GIFT City, encompassing fund administration and accounting services. Ensuring adherence to all regulatory mandates, these trustees offer invaluable guidance on regulations and manage regulatory communications, thereby playing a critical role in the robust framework of AIF management in India.

- **SECURITISATION TRUSTEE**

The Securitisation business is a very active business in India wherein Debenture Trustees have started acting as a Trustee to Direct Assignment (DA) of Loan Pools, including diverse sectors such as Car, Truck, Microfinance Institutions (MFI), Housing, and Retail, which involves a critical fiduciary role in managing and securing the interests of the beneficiaries (investors).

In addition to this, serving as a Trustee or Collection & Payout Agent for Loan Securitisation Trusts encompasses the meticulous setting up of Securitisation Trusts, which are essential for the securitisation process. These entities hold the receivables along with the underlying assets in trust, safeguarding the interests of the beneficiaries. The role extends to ensuring the smooth flow of funding, administering timely payouts to investors, and maintaining regular reporting to keep all stakeholders informed. Moreover, these trustees are instrumental in the redressal of investor grievances, providing a crucial communication link between the investors and the management of the loan pools. This comprehensive suite of services ensures the integrity and efficiency of loan securitisation, making it a pivotal component in the structured finance ecosystem in India, thereby enhancing investor confidence and market stability.

Our presence on almost all bespoke social media platforms, corporate events, seminars & continued rapport with existing clients & prospects, has helped us create a sense of brand recognition among any person we come across.

Expertise: Our Company has employed experienced and qualified professionals who have their domain in trustee services, client relationship, debt & capital markets, banking, etc. This mix enables us to deliver on our promise to provide high-quality services to our clients.

Technology: Our Company has continuously invested in modern technology to improve our efficiency and effectiveness. This allows us to provide our clients with better services at a lower cost. Beacon has successfully developed adaptable and flexible ERP and other product-based software, like Beacon ERP & Beacon Prosec, to further its tech-advent. The digital infrastructure is well designed to address the needs of all stakeholders with the systems' ability to offer role-based access to all the participants including the customers. Further, the systems have enabled significant automation & helped Beacon in reducing human intervention.

Business Model: Beacon is adorned with an astounding inherent ability to conduct its operations on an ‘Asset Light’ & ‘Debt Free’ model basis. The same enables us to avoid any high cost debt servicing owing to capex requirements as may be envisaged in any other service business.

2. Weaknesses

High costs: Our company can address high costs by Investing in technology to improve efficiency and reduce costs. Developing economies of scale by expanding our business operations. Offering value-added services to our clients that can justify our higher costs.

Complex regulations: The Company is obligated to monitor compliance with provisions of extant SEBI Regulations, SEBI Guidelines, SEBI Circulars, Companies Act & Rules, RBI Directions & Notifications, Contract Law, Stamp Duty Law, Finance Act, Income Tax Act, etc.

Competition: The Corporate Trustee space has witnessed a marginal rise in the number of SEBI Registered Debenture Trustees. New entrants have largely resorted to predatory pricing backed business development. While this may pose a difficulty for the company to attract & retain clients, the doubtful survival of such entities also presents the company an opportunity to contemplate on strategic acquisitions.

3. Opportunities

Growing demand for trustee services: The demand for trustee services is growing in India due to the increasing number of complex financial transactions. This presents an opportunity for SEBI registered trustee companies to grow their businesses.

Expanding product and service offerings: SEBI registered trustee companies can expand their product and service offerings to meet the growing needs of their clients. For example, they could offer new trustee services for asset securitization, structured finance, and other complex financial transactions.

Expansion into new markets: SEBI registered trustee companies can expand into new markets, such as tier-II and tier-III cities. This would allow them to reach out to a wider range of clients and grow their businesses.

Positive Outlook on Industry: The Indian Bond Market has showcased a notable CAGR of ~9% over the past 5 financial years. As per a report by CRISIL RATINGS, the outstanding size of Bonds Market is expected to grow by over 100% y-o-y basis, with FY 2023 at ~INR 43 Lakh Crore to ~INR 100 - 120 Lakh Crore by FY 2030. The positive forecast for capex to rise by 1.7 times to ~INR 110 lakh in FY 2023 – FY 2027 as compared to previous 5 Fiscal Years. The same is expected to fuel growth of the Bond Market alongside the Corporate Finance & Equity Market. The Corporate Bond Market is poised to more than double by FY 2030 owing to expected rise in capex, retail credit growth, increase in quantum of retail investors & recent regulatory amendments mandating large corporates to access Bond Market for any incremental borrowings.

Service verticals other than Debenture Trustee, namely AIF Trustee, Securitization Trustee, Security Trustee & Escrow Agent, are poised for a positive outlook owing to historic growth rate of Corporate Finance, Capex Requirement, Funds raised & invested by AIFs & Retail Loan Portfolio growth in HFCs, MFIs & Vehicular Finance. The forecast for upcoming is approximately estimated to be fairly positive owing to macro-economic growth & the nation’s march towards becoming a USD 5 trillion economy and the third largest in the world market exchange rates by 2027, aided by the demographic advantage & pace of financial sector development.

The positive outlook on Industry backed by Beacon’s inherent ability to conduct its business operations on ‘Debt Free’ & ‘Asset Light Business Model’ basis alongside market reach & brand recognition of Beacon put us at advantageous position to substantially benefit & materialize desired revenue targets from the forecasted growth.

4. Threats

New regulations: The government may introduce new regulations for SEBI registered trustee companies in the future. This could increase their compliance costs and make it more difficult for them to operate.

Economic downturn: An economic downturn could lead to a decrease in the demand for trustee services. This could have a negative impact on the business of SEBI registered trustee companies.

Technology disruption: New technologies could disrupt the trustee industry and make it more difficult for SEBI registered trustee companies to compete. For example, blockchain technology could be used to create new and more efficient ways to provide trustee services.

Current versus non-current classification

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as noncurrent.

Deferred tax assets and liabilities are classified as noncurrent assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle.

Principles of Consolidation:

Associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting , after initially being recognised at cost.

Equity method

Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in Consolidated Statement of profit and loss, and the Group's share of other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates are recognised as a reduction in the carrying amount of the investment.

Unrealised gains on transactions between the Group and its associate are eliminated to the extent of the Group's interest in the entity. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

The carrying amount of equity accounted investments are tested for impairment in accordance with the policy described in note 1(l) below.

b. Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and the disclosure of contingent liabilities at the end of reporting period. Although these estimates are based upon the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

c. Property Plant and Equipment (Fixed Assets)

Property, Plant and Equipment (including intangible assets) are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises the purchase price and any directly attributable cost of bringing the asset to its working condition for its intended use. Gain or losses arising from de-recognition of property, plant and equipment (including intangible assets) are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

Individual low cost assets (acquired for less than Rs. 5,000/-) are depreciated in the year of acquisition.

d. Intangible Assets

Intangible assets are amortized on a straight line basis over the estimated useful economic life. The group uses a rebuttable presumption that the useful life of an intangible asset will not exceed five years from the date when the asset is available for use. If the persuasive evidence exists to the effect that useful life of an intangible asset exceeds five years, the company amortizes the intangible asset over the best estimate of its useful life. Such intangible assets and intangible assets not yet available for use are tested for impairment annually, either individually or at the cash-generating unit level. All other intangible assets are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

e. Depreciation

Depreciation on property, plant and equipment is provided using the Straight Line Method ('SLM') using the rates arrived at based on the useful lives estimated by the management. Intangible assets are amortized on a straight line basis over the estimated useful life. The Group has used the following rates to provide depreciation/amortization on its Property, Plant and Equipment (including intangible assets):

	Useful life as per management (SLM)	Useful life as per schedule II (SLM)
Computers	3 years	3 years
Computer Software	3 years	3 years
Office Equipment	5 years	5 years
Furniture and Fixtures	10 years	10 years
Server and Network	6 years	6 years

The management believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of fixed assets, though these rates in certain cases are different from lives prescribed under Schedule II of Companies Act, 2013.

f. Investments

Investments are classified as long term or current in terms of AS-13. Long Term investments are carried at cost less provision for diminution, other than temporary. Current Investments are carried lower of cost or market value.

g. Impairment of Asset

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

Other impairment, depreciation/amortization is provided on the revised carrying amount of the asset over its remaining useful life.

h. Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured.

Annual Fees for trusteeship services and servicing fees are recognized, on a straight line basis, over the period when services are performed. Initial acceptance fees for trusteeship services is recognized as and when the 'Offer / Consent Letter' for the services to be rendered is accepted by the customer. Apart from this any documentation and other income related to the trusteeship services is recognised on basis of probable economic benefits will flow to the the Company.

Under the new SEBI Guidelines dated November 3 & November 12, 2020, the Debenture Trustees (DT) are mandated to undertake independent assessment of assets being offered as security, periodic monitoring, and compliance of the 'security created' or assets on which charge is created along with any applicable covenants or terms of the issue of listed debt securities incorporated in the debenture trust deed. Considering the increase in the efforts, the current revenue structure also underwent a change during current financial year onwards which originates from the manifold increase in the responsibility of the Debenture Trustee (DT) following the amendments in SEBI regulations relating to DT, ILDS and LODR respectively.

Interest income on fixed deposits is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head "Other income" in the statement of profit and loss.

Financial and other advisory fees collected is recognised as a part of 'Other Operating Income' basis to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Realized gains and losses on mutual funds are dealt with in the statement of profit and loss. The cost of units in mutual fund sold are determined on weighted average basis for the purpose of calculating gains or losses on sale/redemption of such units.

i. **Leases**

Where the Group is lessee ;

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases.

Operating lease payments are recognized as an expense in the statement of profit and loss on a straight-line basis over the lease term.

Prior Period Adjustments

Earlier year items, adjustment / claims, arisen/ settled / noted during the year, if material in nature, are debited/credited to prior period expenses/income or respective heads of Account, if not material in nature.

j. **Employee Benefits**

Short Term Employee Benefit obligation:

All employee benefits payable wholly within twelve months of rendering the service are classified as short term employee benefits and they are recognized in the period in which the employee renders the related service. The Company recognizes the undiscounted amount of short term employee benefits expected to be paid in exchange for services rendered as a liability (accrued expense) after deducting any amount already paid.

Defined Contribution Plans

- I. Retirement benefit in the form of provident fund is a defined contribution scheme to the extent applicable. The contributions to the provident fund if charged are routed through the Statement of Profit and Loss for the year when an employee renders the related service. The Group has no obligation, other than the contribution payable to the provident fund to the extent applicable.

II. **Gratuity Obligation**

The liability recognised in the balance sheet in respect of gratuity plans is the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation. This cost is included in employee benefit expense in the statement of profit and loss.

Liability for employee benefits, both short and long term, for present and past services which are due as per the terms of employment are recorded in accordance with Accounting Standard - 15 (Revised 2005) "Employee Benefits" issued by the "Institute of Chartered Accountants of India (ICAI)" to the extent applicable.

l. **Foreign Exchange Transactions**

Transactions in foreign currencies are recorded in the books by applying the exchange rates prevailing on the date of the transaction. All monetary items denominated in foreign currency assets and liabilities are restated at the exchange rate prevailing at the year end. Any income or expense on account of the exchange difference either on settlement or on transaction is recognized in the profit & loss account.

m. **Taxes on Income**

a. Tax expense comprises current tax and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income Tax Act, 1961 enacted in India. The tax rates and the tax laws used to compute the amount are those that are enacted or substantially enacted, at the reporting date.

b. Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originated during the current year and reversal of timing differences of earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred tax liabilities are recognized for all taxable timing differences. Deferred tax assets are recognized for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations, where the Group has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the Group re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

n. Cash and cash equivalents

Cash and cash equivalents for the purpose of Cash Flow Statement comprise cash at bank and in hand and short-term investment with an original maturity of three months or less.

o. Segment information

The Company is engaged primarily in the trusteeship business and its business operations are concentrated in India. Accordingly there are no separate business segments and geographical segments as per Accounting Standard 17 – Segment Reporting issued by The Institute of Chartered Accountants of India.

p. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

q. Provisions, Contingent Liability and Contingent Assets.

A provision is recognized when the Group has a present obligation as a result of past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of obligation. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Where doubtful debt remains unrecovered till the end of the year, the same is written off and reversed from the debtors account.

Specific provisions are created in certain cases where recovery is assessed as doubtful even before the due date.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Provision for doubtful receivables / bad debts are recognised based on the detailed analysis and approval of those charged with governance on case to case basis wherein the Group do not have enough security coverage over the said receivables.

Phased implementation of Unified Payments Interface

SEBI has Offer UPI Circulars in relation to streamlining the process of public offer of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use

his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

- b) Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.
- c) Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Offer is being made under Phase III of the UPI (on a mandatory basis).

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public offers shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Offer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Offer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Offer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
